UX Roadmap Fact-Check & Plan

Updated 2026-11-13. Summary of docs/analysis/ux_roadmap_fact_check.md (source of truth). Streamlit console at ui/, HTTP-only, API-driven.

Status: UX1-UX13 are delivered and closed (#130-#136, #145, #151-#156). The remaining tranche, UX14-UX15, is opened as #157-#158 and mapped to Project #8 Workstream M.

Assessment: 'Don't make me think'

What works well: HTTP-only client; grouped, role-aware navigation; 15-step tour and action-based Get started checklist; Query Studio templates, history, compare and result tabs; dataset evaluation with per-case isolation; trace waterfall; governance filters/export; admin safety; remediation hints; persistent workspace and shareable deep links; background evaluation jobs; Dataset Studio authoring; cross-object evidence and request diffs; keyboard-first command palette plus a WCAG 2.2 AA decision record; responsive layout, compact density and light/dark/high-contrast themes.

Remaining friction: one generic tour for every persona; no demo mode or safe reset; bad answers cannot be annotated or promoted into evaluation data; no saved executive/ops dashboards.

Delivered UX Workstreams (Closed)

ID	Workstream	Issue	Status	Evidence
UX1	Simplify IA and onboarding	#130	Shipped	ui/navigation.py; tests/test_ux_navigation.py
UX2	Query Studio workflow polish	#131	Shipped	ui/query_studio.py; tests/test_query_studio.py
UX3	Evaluation UX improvements	#132	Shipped	ui/evaluation.py; tests/test_ui_evaluation_ux.py
UX3b	Dataset execution follow-up	#145	Shipped	ui/evaluation.py; tests/test_ui_dataset_evaluation.py
UX4	Traces timeline/waterfall	#133	Shipped	ui/traces.py; tests/test_ui_traces_timeline.py
UX5	Governance filters and export	#134	Shipped	ui/governance.py; tests/test_ui_governance_filters.py
UX6	Admin/tenancy safety UX	#135	Shipped	ui/admin.py; tests/test_ui_admin_safety.py
UX7	Polish, a11y, empty states	#136	Shipped	ui/polish.py; tests/test_ui_polish.py
UX8	Persistent workspace/deep links	#151	Shipped	ui/workspace.py; tests/test_ui_workspace.py
UX9	Background evaluation jobs	#152	Shipped	ui/eval_jobs.py; tests/test_ui_eval_jobs.py
UX10	Dataset Studio authoring	#153	Shipped	ui/dataset_studio.py; tests/test_ui_dataset_studio.py
UX11	Cross-object evidence	#154	Shipped	ui/evidence.py; tests/test_ui_evidence.py
UX12	Command palette + WCAG 2.2 AA	#155	Shipped	ui/palette.py; ui/a11y.py; tests/test_ui_palette.py; docs/accessibility.md
UX13	Responsive layout, density + themes	#156	Shipped	ui/theme.py; tests/test_ui_theme.py; docs/layout-and-theme.md

Remaining UX/UI Proposals (UX14-UX15, Opened)

Opened as #157-#158. Tracking: label ux, link to umbrella #43, Project #8 Workstream M, milestone H4, HTTP-only rule plus AST/client tests for every change.

ID	Proposal	Priority	Problem	Acceptance
UX14	Role-based guided journeys and demo mode	P2	One generic tour; no safe demo data or reset for personas.	Each persona journey <10 min; reset is clean; tour covers new screens; no produc
UX15	Collaboration and feedback capture	P2	Bad answers cannot be annotated or promoted into evaluation data; stakeholders rely on copy/paste.	Flag + add to dataset is one click; annotations survive reload; exports are redacted.

Recommended Execution Order

1. UX8 persistence/deep links unlocked the rest. 2. UX9 removed the biggest evaluation blocker. 3. UX12 delivered the accessibility gate. 4. UX10 made evaluation repeatable. 5. UX11 shortened debugging. 6. UX13 added the responsive/theming baseline. 7. UX14-UX15 add persona onboarding and collaboration polish.

Bottom Line

UX1-UX7 turned the console from a functional API demo into a role-aware, guided workflow surface. UX8-UX13 made it persistent, asynchronous, evidence-linked, keyboard-accessible and responsive. The remaining tranche (#157-#158) should make it persona-specific and collaborative.
